## Toxic Fuels

Toxic Fuels, our campaign in partnership with [WWF-UK](#), aims to raise awareness of an emerging global trend to extract oil from unconventional fuels, such as [tar sands](#) and [shale oil](#). Such exploitation threatens global efforts to avoid dangerous levels of climate change and risks local ecological disaster.

### ITALY'S LEGACOOP TO GIVE MAJOR BOOST TO COOPERATIVE EUROPE'S ACT !

The world-renowned Italian APEX group, Legacoop proposes to give a major boost to the efforts of Co-operatives Europe's **ACT!** to address the climate threat.

"Cooperambiente" is Legacoop's overall project to address the climate threat, including a focus on the production and use of renewable energy, objectives that it shares with **ACT!**.

Cooperambiente has arranged an exclusively co-operative facility in the main Italian Event on the environment and climate change, Ecomondo taking place in Rimini, Italy October 28-30th, and which will be addressed by Sir Nicholas Stern, author of the Stern Report. (See <http://www.cooperambiente.it/>)

Now, Legacoop has arranged a special event on the 30th October for Ecomondo delegates and the Italian media under the title:-

"Let's **ACT!** now; Environment Is Our Business, Who Can Do Better Than Us?"

### Legacoop, Cooperambiente

**Country:** Italy

**Sector:** Other

### Brief description

Legacoop is an Italian multisectoral national cooperative organisation established in 1886. Today gathers over 15,000 cooperatives active all over Italy and in all the economic sector, with 8,3 million members and over 472,000 employees. The turn-over of Legacoop cooperatives sums up to 56,2 billion Euros (45% of the Italian global cooperatives turn-over).

### Main reasons

Italian cooperatives have always been very committed to environmental responsibility and sustainability. In some sectors, Legacoop member cooperatives have been pioneers in awareness rising campaigns on these crucial issues as well as in adopting an environmental sustainable approach to their business activities.

### Aims and objectives

As a multisectoral national organization, Legacoop, through the project COOPERAMBIENTE, launched in 2008, wishes to promote the coordination, the visibility and joint projects among different sectors devoted to highlight the commitment of Legacoop member cooperatives and the best experiences to share, at European and international level.

### How the project or case study helps fight climate change

A brief overview of the different types of activities carried out by our member cooperatives working in various sectors:

- 1) The housing and building cooperatives, promote bio-climate planning (architectural planning and home intervention) ; energy efficiency ;

Yvo de Boer  
Executive Secretary  
United Nations Framework Convention  
on Climate Change  
P.O. Box 260124  
D-53153 Bonn  
Germany

01 December 2009

Dear Mr. de Boer,

I am writing to transmit to you and the UNFCCC the resolution passed by the International Co-operative Alliance (ICA) during its recent General Assembly with regard to Climate Change.

The International Co-operative Alliance (ICA) is an independent, non-governmental organisation, which unites, represents and serves co-operatives worldwide. The ICA was founded in 1895 and has 233 member organisations from 89 countries, representing nearly one billion individuals worldwide. It holds general category Consultative Status with the UN Economic and Social Council (ECOSOC).

You should be aware that the leading 300 co-operative enterprises have a combined turnover equivalent to the 10<sup>th</sup> economy of the world and thus the Co-operative Movement represents a formidable partner to address Climate Change.

The ICA General Assembly was held on 19-20 November 2009 at the Geneva International Conference Centre in Geneva (Switzerland). Under the theme "Global Crisis – Co-operative Opportunity", the Assembly addressed the challenges that the global economic crisis, energy needs and climate change present to co-operative enterprises and to the world as a whole. In particular it passed a resolution, as attached, calling on the United Nations and the governments of all countries participating in the Conference of Parties (COP) 15 Climate Change Conference in Copenhagen, in December 2009 to secure a fair, ambitious and binding agreement at the global climate negotiations by:

# Housing co-ops, the ICA & the climate threat

- An important ICA sector
  - *scale, organisation and influence*
  - *climate threat impacts*
    - *Scope for energy reduction and renewables*
- Some significant cases to date
  - HSB climate strategy & Climate Agreement
  - CECODHAS – Power House Europe
  - this conference
- However, scope to do more co-operatively !

# • Climate Threat & year of co-ops 2012

- 2012 is end for current Kyoto protocol
- also, UN International year for co-operatives
- Important opportunity to project co-op model
- Yes, economic/business model is crucial
- But also important to show values basis
- How better than focus on climate threat
- Consider alternative of not

# **ACT!** now - time is short

- co-ops to focus on own activities
- Inform/motivate workers and members
- Lobby and campaign
- Support renewable energy
- Together please –  
to max co-op impact & benefit
- **ACT!** Needs your help now – please?

# The essence of co-operative values

“We must be  
the change  
we wish to see  
in the world.”

Gandhi
